Camden Data Charter

Camden have developed a Data Charter - it guides how we collect, use and share information in a fair way.

We make use of a wide range of data to improve your experiences with us.

We want to be transparent and show we can be responsible in keeping your data safe.

The principles of the Data Charter are

1. Build trust by being transparent
2. Be accountable and protect your rights over your data
3. Make sure data is secure, safe and used fairly
4. Make sure data is handled respectfully and only used for the good of our residents
5. Using an outcomes-based way of working will benefit everyone
6. Be clear about how we use your data
7. Protect your rights and privacy
